

1 Chart Correction/Storage Terms & Conditions

Within our Superyacht Bridge Services program, Bluewater offers our large yacht customers storage space for their charts at our climate controlled Dania Beach warehouse. Bluewater also offers a chart correction service for British Admiralty charts. Our correction team will accurately update your charts as well as replace old chart editions and cancellations.

The following rules and criteria govern Bluewater's Storage/Correction Policy:

1. The cost for storage space starts from \$150 per year, billed \$60 per Quarter. During that period, the storage space is assigned and used only by your vessel. You may ship your folios at any time to our store to be put into storage (refer to page 3). You may also request your charts to be picked up or shipped to you at any time.
2. We only accept charts in storage-ready condition (i.e. we prefer charts to be in properly labeled folios). If charts are not storage-ready Bluewater can organize them for an hourly rate of \$25.00 per hour. Rolled charts and oversized Oceanografix will be accepted for storage but the hourly rate will be charged to organize, flatten and/or fold these charts. Bluewater can also provide storage for current publications but an additional storage space must be purchased at \$150.00 per year.
3. A chart storage record (Bluewater provided) will be signed by a representative of the vessel and be the agreed charts in storage. Bluewater keeps records for individual vessels that reflect when folios are given to and received from the vessel. Bluewater will provide the vessel a detailed list of all charts that we have accepted for storage within one month of receipt. This list is available electronically to the vessel at any time.
4. Chart correction is done on a first come first served basis. In order to meet your needs please contact Bluewater at least 1 month before charts are needed. We will confirm delivery feasibility based on current correction schedule and a committed delivery date will be given. Once charts are returned to the vessel an updated inventory of the charts/pubs left in storage will be generated and emailed to the vessel.
5. Chart corrections will be done for a charge of \$3.50 per correction with a maximum of 6 corrections per chart. After 6 corrections the chart is replaced at a cost of \$42.95.
